

ANNUAL REPORT 2019

*The Board of Trustees of the
Philippine Wood Producers Association, Inc.,
by unanimous concurrence, submits herewith the
Statement and Annual Report of the Chairman of the
Board of Trustees as its Report to the
Members of the Association
for the year ended December 31, 2019.*

CHARLIE H. LIU
Chairman

Vision

A strong and dynamic organization committed to the economic and environmentally sound development of the Wood Industry in the Philippines

Mission

In partnership with government and all concerned stakeholders, we shall:

- *Conserve and protect the environment through the sustainable management of natural and plantation forests;*
- *Utilize technology and best practices for the production of high quality wood products at competitive prices;*
- *Promote and encourage the use of high quality wood products;*
- *Work for appropriate legislation and good governance to ensure the sufficiency of wood resources and enhance the competitiveness of the wood industry;*
- *Contribute to the well-being of workers and communities where the wood industry operates.*

About the cover: *Dipterocarpus grandiflorus* (Blanco) or *Apitong*. A medium wood that is priced less than the narra, another medium wood. It is light brown in color, but for exterior uses, it is blackened for durability. It does not have the color and sheen of the red and yellow narra. Apitong used to be plentiful in hardware stores, often purchased by buyers with limited budgets.

PWPA Holds Philippine Wood Expo 2019

As an offshoot of the 1st Philippine Wood Expo and Forum (PWEF) last October 25-26, 2016 at the Manila Hotel, the Philippine Wood Producers Association (PWPA) held the Philippine Wood Expo (PWEX) 2019 last October 21-22, 2019 at the Sofitel Philippine Plaza, Manila.

Like the PWEF 2016, the PWEX 2019 is a business-to-business expo aimed to promote the PWPA; correct the public's misconception of the wood producers and manufacturers; attract and expand business reach by meeting relevant partners; and highlight latest industry trends, technologies, and products.

With the theme “Greener Economy through a Wooden World”, PWEX 2019 was participated by 13 local and 4 international exhibitors representing different wood industry sectors led by wood production and services, construction and furniture design, industrial automation and technical education sectors. A total of 584 guests representing 331 companies attended the two-day event with high profile dignitaries from the

government, consultants, chief executive officers and other decision makers from the wood and construction industries.

PWPA Chairman Charlie Liu opened the event with his signature greeting “Wood Morning” and welcomed and thanked all the guests and participants of the wood expo and forum. He believes that the holding of the event is always timely especially now that even Ms. Greta Thunberg, a young adult, called the support of everyone to prevent further impact of climate change.

He emphasized the importance of the development of tree plantations which is one of the advocacies of the Association. He said young trees absorb more carbon. When matured, harvested, and turned into wood products, it will continue to store the absorbed carbon unless burned.

He added that development of more tree farms/plantations will also generate jobs in the countryside with ripple effects to the cities in the region; socio-economic improvement of the lives of our fellow countrymen; and contribution to the coffers of the country.

He also mentioned the different opportunities and potentials of developing tree plantations and when realized, it will greatly contribute to the inclusive growth of the country.

Report to the Members

He then informed them of what to expect during the two-day event, the exhibition, and the break-out sessions. He said the topics identified and selected are interesting which covers government programs, policies to wood products legality, sustainability, designs and technologies.

In a video message, Senate Committee on Environment and Natural Resources Chairman Honorable Cynthia Villar congratulated the PWPA and gave support to the Association and the PhilWood Expo 2019.

House Committee on Natural Resources Chairman Honorable Elpidio Barzaga, Jr., gave the keynote message for the event.

He congratulated the PWPA in holding the PhilWood Expo and said that it is a good

platform where wood industry stakeholders to gather and be informed of the new trend in the industry.

He also said that he will support the industry and the forestry sector in their efforts in pushing for the passage of the Sustainable Forest Management Act Bill into law in Congress as he understood the benefits it will provide the government and the country. He added that he also sees the needs of the industry and a stable policy is needed to encourage investments in the industry.

Instead of ribbon cutting, the signature cake (molded as engineered wood tiles glued together) cutting was made to open the event followed by a festive traditional folk dances Carinosa, Maglalatik and Tinikling.

The PWEX 2019 is co-presented by FILTRA Timber.

Other exhibitors who participated in the event are MATIMCO, Inc., Canadian Forest Products Ltd, NTE Company (Pty) Ltd, Rising Sun Wood Products, Inc., RI Chemicals Corp., Shin Yang Group of Companies (Woodbased Division), Rubner Holzbau – timber engineering, American Technologies,

Report to the Members

Inc., Windel Woodcraft, Philippine Center for Environmental Protection and Sustainable Development, Inc., Department of Environment and Natural Resources - Forest Management Bureau (DENR-FMB), Society of Filipino Foresters, Inc. (SFFI), Department of Science and Technology – Forest Products Research and Development Institute, Clockwise Woodcrafts, Green Restorative Actions and Sustainable Solutions, and Home Builders.

Break-out sessions includes topics on the programs, policies, designs and technologies on wood industry and forestry, legality, sustainability and certification trends, timber building technology and local and international architectural designs. These are delivered by local and international experts with the likes of SFFI National Council President Tommy Valdez, President and Co-Founder of the Nordic Chamber of Commerce of the Philippines Mr. Petteri Makitalo, DENR FMB For. Eldie Quilloy,

Junckers Export Manager Julia Weisse Hellum, Malaysian Timber Certification Council Chief Executive Yong Teng Koon, Forestry Officer of the Food and Agriculture Organization Regional Office for Asia and the Pacific Forester Bruno Cammaert, Goudie Associates Lead Architect Arch. Jon Ander Bilbao, and Authorized Officer/Prokurist of Rubner Holzbau GmbH Ing. Anton Wanas.

The PWPA members, exhibitors and guests were entertained by the Ross Christian Faith Band during the Fellowship Night where members and guests joined in their singing with the Band. It also served as a venue for networking and interaction between the members, the exhibitors and guests. Raffle prizes were also given away during the night.

Chair Liu with Vice Chair Ramon Uy acknowledged all their partners by giving them a small token of appreciation.

PWPA Vice Chair Uy, in his closing remarks, thanked everyone who celebrated another milestone for PWPA. He congratulated Chair Liu, the organizers, and all the PWPA members.

Report to the Members

The event was closed by another traditional folk dances, Maria Clara and Tinikling, where some of the guests were encourage to try the Tinikling dance.

PWPA Speaks at the SFM Wood Summit

The Philippine Wood Producers Association, Inc. (PWPA) led by Chairman Charlie Liu attended the Sustainable Forest Management (SFM) Wood Summit last January 29, 2019 at the EDSA Shangri-La, Ortigas Center, Mandaluyong City. Chairman Liu was also invited to talk about the Role of the Wood Industry in Nation Building.

The SFM Wood Summit is organized by the Department of Environment and Natural Resources Forest Management Bureau with the objective of presenting and discussing the current policy environment overarching to the needs of each industry sector, business trends and ways forward in order to develop and implement an effective regulatory and investor-friendly regime that can provide

practical and effective solutions to ensure the sustainability of the Wood Industry in the Philippines.

With the PWPA, representatives from other government agencies, and other sectors of the industry like the Industrial Forest Management Association of the Philippines (IFMAP), Community-based Forest Management Peoples Organizations (CBFM-POs), private plantation owners; the Chamber of Furniture Industries of the Philippines, Inc. (CFIP), Wood Processing Plant Permit Holders, construction, biomass and fuelwood industries, Consumer Groups, among others attended the Summit.

DENR Secretary Roy Cimatu graced the event and made a keynote speech where he provided some history about the industry and also intimated that that Executive Order No. 23, the Moratorium on the Harvesting of Natural and Residual Forest and the Creation of the Anti-Illegal Logging Task Force, should not be seen as an oppressing law but an investment for ensuring that our forests will replenish and recover so it can provide the necessary services for our people.

He mentioned further that the DENR is promoting sustainable forest management program that provides balance between economic, social and environmental impacts. He also disclosed that they are creating opportunities so the industry will recover

Report to the Members

through the implementation of the ease of doing business law, vertical integration of wood processing, forest certification system, among others.

To set the tone for the Summit, DENR FMB Director Nonito Tamayo presented the status of the Philippine Wood Industry and National Economic Development Authority Director Nieva Natural on the contribution of the forestry sector to the Philippine economy.

With these presentations, representatives from the different industry sectors from the producers, processors, manufacturers, among others presented their position papers.

PWPA Chairman Liu presented the position of the Association on the Wood Industry's role in nation building.

His presentation focused on PWPA's advocacy on the promotion of the establishment of

more tree plantations in the country which will answer the three bottom lines, social, economic, and environmental benefits. He said that with the establishment of more tree plantations, millions of jobs will be created, especially in the countryside, that will promote economic activity in the area and results to taxes for the government. With the development of tree plantations, environmental health is also covered. He stressed that the sector, having a renewable resource, will promote sustainable forest management.

Forester Lawyer Roberto Oliva facilitated and moderated the open forum and the synthesis of the discussions during the Summit while FMB Assistant Director Mayumi Natividad close the Summit saying that the FMB will start the comprehensive review of the production forests under IFMA and implement the ease of doing business by streamlining processes to facilitate investments in forestry. She added that they will continue their mission to find ways to balance the social, economic, and ecological requirements for the management of the Philippine forests.

As an observation, the industry has not really been heard personally by the DENR Secretary because he has to leave the event. And though the discussion has been synthesized and recommendations have been made, there was no concrete commitments on how these will be realized.

Report to the Members

The representatives of the wood industry will appreciate to have a continuous discussion on this so the recommendations will be put into actions and be implemented.

PWPA Meets DENR Secretary Cimatú

The Philippine Wood Producers Association, Inc. (PWPA) led by Trustee Evaristo Narvaez, Jr. met with Department of Environment and Natural Resources Secretary Roy Cimatú last February 22, 2019 in his office in NAMRIA, Taguig City to discuss the position of the PWPA regarding the need for sustainable, legal, and local source of raw materials.

Trustee Narvaez, Jr., assigned as the spokesperson of the Association, thanked DENR Secretary Cimatú for sharing his time with the Association and General Boots de Veyra for his assistance. He apprised the good Secretary about the need of the industry for a sustainable, legal, and local source of raw materials. He said providing the industry with locally sourced raw materials will bring about socio-economic and environmental benefits to the country.

Narvaez, Jr. shared his experiences when he was with PICOP and said that they practiced

sustainable forest management in their area. He added that they promoted economic activities in the area as they have provided the community with jobs and means of livelihood. This in turn contributed to the coffers of the country through sales, local and export, of their products and the taxes from their company.

However, he added that with the present situation where majority of the wood products in the market are imported, the country is being robbed of its inclusive growth factor considering the comparative advantage we have.

Hence, Narvaez, Jr. shared the advocacy of the PWPA in promoting the establishment of more tree plantations adding that the PWPA cannot do it alone as they need the help of the government and other stakeholders to realize said advocacy. He said a stable policy to this effect is being recommended.

He mentioned that though there is an existing moratorium in the harvesting of trees in the natural and residual forests, there are still wood/wood products that gets out of these forest areas hence he suggested the implementation of forest certification to ensure that all products came from legal sources.

Narvaez, Jr. said that there are many investors who are interested to put their capital in the country but once they learned about the policies, they were discouraged as it takes time for the approval of the tenurial agreement, harvesting permits and other documentary requirements. He said it will be more acceptable to the investors to have an identified area immediately where they will only do due diligence and start activities immediately. He added that the area should also be accessible and has no peace and order problem.

Report to the Members

Further explanation was given by General de Veyra, who is in the housing sector together with Cebu Holdings President Aniceto Bisnar, Jr. and Forester Oscar Gendrano.

Secretary Cimatú said that the news that most of the wood products in the country is imported is very alarming however, he also does not want trees to be cut in the natural and residual forest. However, he said that it is important that the industry will have sustainable and legal sources of local raw materials.

He remembered that when he was assigned in Surigao del Sur, he visited the area of PICOP and was really amazed how the area maintained its forest cover when harvesting of trees is happening in the area.

Cimatú said that the DENR should help the industry and make it easier for them to get areas for development where they can invest so that there will be more plantations where the industry can source their raw materials locally, sustainably and legally.

He requested Assistant Secretary (Asec) Ricardo Calderon and FMB representative For. Rene Siapno on their ideas or policy on how this can be possible which includes the area needed by the industry to supply the domestic requirement of the country.

Asec Calderon informed Secretary Cimatú that there are areas which are in the production forestland where the industry can develop plantations which could be the source of their raw materials. There were also areas with tenure but the use has not been maximized because the investors were discouraged to plant because there are no assurance that they can harvest what they planted or the processes in getting permits are longer than necessary.

Calderon added that having a tree plantation/production economic zone something like the PEZA can be an ideal arrangement for the industry. He said that the DENR Secretary can declare a certain production forestland as a tree/forest development zone. He said in PEZA arrangement, the LGUs have no more control in the area and the incentives are more encouraging and the BOI incentives can also be applied. He said that the Secretary might be able to have an Executive Order (EO) signed by the President on Tree Plantation/Production Economic Development Zone similar to the Manila Bay EO. He said the DENR can identify areas in the production forestland, about 500,000 to 1,000,000 hectares, all over the country so there will be enough local sources of legal raw materials.

Secretary Cimatú is open to the suggestion and instructed Asec Calderon with the FMB to discuss with the PWPA what their recommendations in drafting the policy.

The delegation from the PWPA and the other stakeholders present were agreeable to the idea and said that it will be more acceptable to the players and the investors as well.

PWPA Joins APFW in South Korea

The Philippine Wood Producers Association, Inc. (PWPA) Executive Director Maila Vasquez joined the Asia-Pacific Forestry Week (APFW) 2019 in Incheon, South Korea last June 17-21, 2019 through the sponsorship of the Program for the

Report to the Members

Endorsement of Forest Certification (PEFC).

The theme of the APFW 2019 is “Forests for Peace and Well-being.” It was jointly organized by the Korea Forest Service (KFS) and the Food and Agriculture Organization (FAO) and was participated and supported by different partners and collaborators, including government, NGOs, researchers, academe, and the private sector.

As practiced, there were 5 streams that the participants can choose where they can participate. These were: a. Restoring Forest Landscapes; b. People and Forests Living in Harmony; c. Building a Resilient Environment; d. Promoting Responsive Trade and Markets; and e. Innovating Governance and Institutions.

ED Vasquez joined Stream 4 which is on Promoting Responsive Trade and Markets and other PEFC sponsored and some plenary session events. There are other events in the streams also given by different Partners like the Forest Department of Sarawak, Malaysia; Forest Stewardship Council; Korea Forest Service; among others.

The different events sponsored by the PEFC in stream 4 and its side events focused more on the following:

- a. PEFC Certification: The choice for Sustainable Sourcing – discussed the

current status, policy impacts and meeting market demands for sustainable forest management certification

- b. Development of synergies between PEFC and other initiatives such as FLEGT utilizing experience in ASEAN – discussed the different legality and sustainability standards being undertaken and how they can work together considering that they have the same purpose.
- c. Reimagining sustainable forest certification: Realizing Impacts in the Asia Pacific – discussed how forest certification contributed to sustainability and facilitation of trade and the emerging initiatives to realize sustainable forest management.

Plenary sessions on the following were also attended:

- a. Forests for peace and well-being: Towards a brighter future – discussed the role of forestry in achieving sustainable development goals on life on earth, good health and well being & peace, justice and strong institutions.
- b. Achieving the sustainable goals: Accelerating the forestry contribution - discussed the role of the forest in achieving the sustainable development goals, how forests are influenced by major drivers of change and also the challenges and trends in the last two decades

The APFW 2019 also has an exhibit where some of the Asia Pacific countries displayed booths and also Korean agencies that promotes their products, timber and non-

Report to the Members

timber products, and also services the forest provide for the well-being of the people.

Prior to the event, the DENR-FMB, PWPA, SFFI and PCEPSDI are drafting concept note to be presented during the meeting of the Asia Pacific Forestry Commission which was held back to back to the APFW 2019 event regarding funding request for the development of the Philippine Forest Certification System. However, during the APFW 2019, there were no delegation from the Forest Management Bureau who attended the event hence, the project, who was supposed to be led by the Philippines, will now be led by Vietnam.

The Asia-Pacific Forestry Week (APFW) is conducted every 4 years, the last one was conducted last February 22-26, 2019 in Clark, Pampanga, Philippines. The PWPA also actively participated in the event.

PWPA Joins Meeting with Senator Pimentel

Philippine Wood Producers Association, Inc. (PWPA) Executive Director Maila Vasquez joined the Society of Filipino Foresters, Inc. (SFFI), Department of Environment and Natural Resources — Forest Management Bureau (DENR-FMB) and House of Representatives to attend the meeting with Senator Aquilino (Koko) Pimentel III to seek support for the passage of the Sustainable Forest Management Act Bill in the Senate.

The meeting was made through the assistance of Committee on Natural Resources Secretary Raul Terso. Together with Committee Secretary (ComSec) Terso was also joined by the staff of Cong. Ma. Lourdes Acosta-Alba, Atty. Richard del Rosario, who will also discuss about the Forest Limits Bill.

ComSec Terso gave a background about the bills and informed the good Senator that the SFMA bill is long pending in Congress for more than 20 years. He said that the House approved SFMA bill was endorsed to the Senate last Congress but was not able to pass hence the necessity to deliberate again this Congress. He added that same is true with the forest limits bill.

With Sen. Pimentel's approval, SFFI President Tommy Valdez and Atty. Del Rosario made their presentation on the SFMA bill and forest limits bill, respectively.

After the presentation, Sen. Pimentel asked for clarifications and basis of certain provisions of the law. He also said that like his father, he does not want to allow cutting of trees but agreed that if the trees are planted and in production forestlands, they can be harvested. He said he found the bills significant not only environmentally but socially and economically as well. He said that they will study the bills further and will support the bills.

Report to the Members

ComSec Terso together with the group thanked Sen. Pimentel for his time and said that they will be available if further clarification is needed.

PWPA at the KGP3 Event

The Philippine Wood Producers Association, Inc. (PWPA) is one of the members of the Conveners Committee of the KGP3 (Kalikasan Green Productivity, Green Purchasing Towards Green Philippines). It is a biennial advocacy event organized by the Philippine Center for Environmental Protection and Sustainable Development, Inc. (PCEPSDI) and serves as a green platform for sustainability initiatives and a knowledge hub that seeks to create convergence of commitment towards sustainable development among different stakeholders.

KGP3 is in its 6th year with the theme, “Doing More with Less for a Climate Smart Economy: An Inclusive Growth for Tourism Industry and Upland Community.” There are 3 tracks that the conference offers which deals on sustainable consumption and production (SCP): sustainable business management, sustainable tourism and sustainable forest management.

PWPA Executive Director Maila Vasquez joined the launching of the KGP3 (Kalikasan Green Productivity, Green Purchasing Towards Green Philippines) last September 17, 2020 at the Novotel, Araneta, Cubao City. The launching is an intimate event with the conveners of the event. The conveners were informed of how the main event will materialize and how they can assist in the promotion and implementation of the main event. A Memorandum of Cooperation was signed by and between the conveners which highlights their roles in the KGP3 event.

The KGP3 main event was held last November 5-6, 2020 at Novotel, Araneta, Cubao City.

The first day discussion focused on how the sustainable forest management and tourism respond to the climate challenges and how it will transform towards inclusive growth.

There were five panel discussions that responded to what the DENR's and the DoT's efforts in sustainable development.

The sessions were as follows: a) Government response through policy initiatives; b) sustainable tourism and forestry in action: response towards sustainable development; c) Circular economy: An approach for a resource efficient and low carbon economy; d) Business sustainability on waste management : Beyond the backyard approach; and e) SCP tools and practices towards circular economy.

Trustee Evaristo M. Narvaez, Jr. is one of the discussants for panel

Report to the Members

discussion on sustainable tourism and forestry in action.

Other discussants were representatives from the government, academe, international organizations, development banks, civil society, and the private sector (businesses, trade association, etc.).

On the second day, PWPA attended the sustainable forestry track. The main paper for this track is focused on the “Landscape Approach in Sustainable Managing Forest Lands for a Climate Resilient Towards Achieving Sustainable Development Goals.

There were four panel discussions for this track, namely: a) integrated forest landscape management: how can we achieve increasing the forest cover nationwide and preventing the forest loss and forest degradation; b) Forests, People and Social Action on Forest Landscape Management and Restoration; c) Promoting Sustainable Forest Products, responsible Trade and Markets, and d) Financing forest landscape restoration (FLR): what are different schemes, options, opportunities and challenges.

PWPA ED Vasquez is one of the discussants in panel discussion on Promoting Sustainable Forest Products, responsible Trade and Markets and a facilitator of one of the panel discussions.

PWPA Attends Meeting with the House Committee on Natural Resources

Philippine Wood Producers Association, Inc. (PWPA) Executive Director Maila Vasquez together with representatives from the Society of Filipino Foresters, Inc. (SFFI), Department of Environment and Natural Resources (DENR), Forest Management Bureau (FMB), NAMRIA, civil society and other stakeholders attended the consultation/deliberation of the Sustainable Forest Management Act and the Forest Limits Act Bills at the House of Representatives in Quezon City last November 13, 2020.

House Committee on Natural Resources Chairman Elpidio Barzaga, Jr. chaired the consultation/deliberation. Other members of the House Committee who joined him in the consultations were Cong. Junie Cua,

Report to the Members

Lawrence Fortun, Divina Grace Yu, Leonardo Babasa, Jr., among others.

He welcomed and thanked the resource persons present during the deliberation as he said their comments on the bills that were submitted to the Committee are very important in the passage of the bills.

He added that the Committee will already approve the bills without any changes that was refiled by members of the House Representatives.

The Forest Limits Bill was refiled and was supposed to already pass the Committee level, however the different answers provided by the NAMRIA and DENR-FMB made the members confused requiring both agencies to have their head of office attend the next meeting.

The Sustainable Forest Management Bill were refiled with two different versions: one is the version approved during the last Congress and the other one with some adjustments. Both Congressmen and resource persons agreed to have a meeting to settle the changes in the new version of the bill. Cong. Fortun was appointed as Chair of the Technical Working Group.

PWPA at the Global Forest Industry Forum – Sustainable Wood for a Sustainable World

The Global Forestry Industry Forum was organized by the UN Food and Agriculture Organization (FAO), China National Forest Product Industry Association and the ASEAN Expo under the support of the Chinese State Forestry and Grassland Administration.

Sustainable Wood for a Sustainable World (SW4SW), adopted in May 2018, is a joint initiative of the Collaborative Partnership on Forests (CPF). It is led by FAO, together with the Center for International Forestry Research (CIFOR), the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), the International Tropical Timber Organization (ITTO), the World Bank (WB) and the World Wildlife Fund (WWF). It focuses on cross-sectoral policies, institutions, and finance to develop sustainable wood value chains and increase their contributions to the Sustainable Development Goals (SDGs) and climate change objectives.

The SW4SW conducts regional/sub-regional dialogues aim at presenting and discussing regional/ sub-regional opportunities and challenges of wood value chains and formulating a preliminary roadmap of priorities for unlocking the full potential of sustainable wood value chains to sustainable development.

The initiative targets primary wood value chain stakeholders (including producer associations), industry associations, small and medium enterprises (SMEs), policy makers, governments, the financial sector, non-forest sectors, consumers, multilateral mechanisms and opinion shapers.

The Forum in China aims to deliver a SW4SW dialogue focused on actions to harness sustainable production and trade with technical collaboration of all the SW4SW partners together with Chinese stakeholders and China's main trade partners. It brought together representatives from the governments, producers, consumers, academe, and civil society to formulate and implement actions to promote responsible production and consumption and engender sustainable bioeconomy.

Report to the Members

The Forum was set as a back to back event of the China-ASEAN Expo Forest and Wood Products Exhibition however, most of the participants of the Forum were not able to visit the expo area due to the full schedule of the Forum. During the first day of the Forum, opening speeches were given by the following:

- a. Mr. Dongsheng Liu – Deputy Director of State Forestry & Grassland Administration
- b. Ms. Thais Linhares-Juvenal – Team Leader Forest Governance and Economics, FAO
- c. Ms. Ivonne Higuero – Secretary General, CITES Secretariat
- d. Mr. Zhilin Xiong – Deputy General, ASEAN Secretariat and Deputy General Manager, Guangxi International Expo Group Co., Ltd.

The opening speeches provided the framework for the flow of the Forum/dialogue. It discussed about the need for the rehabilitation of the image of wood because wood is good, and everybody needs wood.

It also mentioned the need to curb illegality to have sustainable trade and the need to work together to have sustainable wood for sustainable world (SW4SW). It also mentioned that though there are species that were not allowed to be traded internationally, majority can still be traded but in a controlled level. This is to ensure that the wood coming from the countries are legal, sustainable and traceable.

Day 1 discussed about SW4SW – Contributions from wood value-chains to the sustainable development goals (SDGs) and the Sustainability of International Production and Trade.

Local and international speakers from academe, government, private sector, among others were invited to discuss what are the efforts of their organizations to promote SDGs and sustainable production and trade.

It was stressed that sustainability should be based in the value-chain and not the supply chain. The value-chain is a broader concept, as it also covers its interrelations with other sectors: economic, social and environment. Loss of any part of the value-chain will mean an interruption to the process resulting to unsustainable value-chain.

A study on the multiplier effects of the forest sector was also presented. Based on the study, the forestry sector contributes to the national economy in 3 ways: direct, indirect, and induced. The study also showed that the downstream sector has higher multipliers than the forestry and the logging sector and that there are potentials for forest resource rich countries to enhance their forest sector's economic contribution.

Another presentation reported that in China, climate change is treated as a common challenge of human change. They said that combatting climate change is the role of everyone hence all actions should be considered to address climate change. It is everyone's responsibility to protect the earth; to have harmony with nature.

With regards to the sustainability of international production and trade, measures on how to cooperate and identify the source of pressure is important. Policies and issues on SDG achievement are some of the challenges that needs to be considered. Hence promotion of the sustainable and legal trading of wood is necessary.

Report to the Members

There was a discussion were importation of wood may become less and less especially in countries where there are potential areas for plantation development. It was mentioned that importation has two negative impacts, contributes to climate change, and reduces inclusive growth of the importing country. Importation is an advantage to those countries where they do not have available areas for development.

SW4SW can only be achieved if all countries do their share in the development and protection of their patrimonies. Like the Philippines, for example, the country is identified as a producer country but with the situation today, the country is no longer entitled to be called such as it is now a net importing country. If the country will not do its role or share, it cannot bring back the value-chain nor can provide enhanced contribution to our economy.

Day 2 discussed about the South-South Cooperation (SSC) which refers to the technical cooperation among developing countries in the Global South (Asia (with the exception of Japan, Hong Kong, Macau, Singapore, South Korea and Taiwan), Central America, South America, Mexico, Africa, and the Middle East (with the exception of Israel). It is used by the states, international organizations, academics, civil society and the private sector to collaborate and share knowledge, skills and successful initiatives in specific areas such as agricultural development, human rights, urbanization, health, climate change etc.

In the Philippines, it is done through bilateral agreements.

As representative from the Philippines, the undersigned was requested to share possible areas for SSC together with representatives from Madagascar, Central Africa and China. While the paper provided information on what the country is doing which will be potential areas of SSC interventions, Madagascar and Central Africa shared the challenges they face in doing international trade especially on the species that were being controlled by CITES. China, on the other hand, discussed on how to move forward by doing what is sustainable and legal and to work on their legality system.

There were also break-out groups where the participants were then divided into 3 groups: Asia, China and others. The group were tasked to share on 1) how SSC can increase contributions of the forestry sector to SDGs, i.e, value addition/employment, efficiency, and climate change/forest cover; and 2) how to enhance timber trade practices to support sustainable timber production.

Day 3 is the field trip to typical Chinese enterprises. The participants were led to visit Guanxi Fenglin MDF factory, Guangxi Gaofeng Forest Park and veneer production park.

Report to the Members

PWPA at TC Meetings

The Philippine Wood Producers Association, Inc. (PWPA) continues to assist in the development of standards to ensure that the products and services provided will be at par with the international standards.

The PWPA, represented by Executive Director Maila Vasquez, is a member of three Technical Committees: on wood-panels (TC 35) where PWPA is the Vice Chair; on Forest and Products (TC 78) where PWPA is the Chair; and lumber and timber products (TC 22) which is on the process of re-activation.

PWPA at the PEFC Global Accreditation Body Training

As a back-to-back event to the Asia-Pacific Forestry Week, the Program for Endorsement of Forest Certification (PEFC) held the PEFC Global Accreditation Body Training in Seoul, South Korea last June 22, 23-25, 2019. It is aimed to provide a formal training on Quality Infrastructures including requirement for Accreditation Bodies and Certification Bodies,

Guidance on Accreditation Programs and PEFC Chain of Custody processes.

It was attended by representatives of accreditation bodies, national governing boards, certification bodies from Asia-Pacific regions.

As the Philippines in in the development stages of its Philippine Certification System, the Philippine delegation from the Department of Trade and Industry Philippine Accreditation Bureau (DTI PAB), the Philippine Wood Producers Association, Inc. (PWPA) and the Philippine Center for Environmental Protection and Sustainable Development, Inc. (PCEPSDI) attended the Global Accreditation Body Training.

PWPA and PCEPSDI were represented by Executive Directors Maila Vasquez and June Alvarez, respectively who were also chairman and vice chairman of the Technical Committee on Forest and Forest Products which develops the standards for chain of custody and sustainable forest management.

Report to the Members

Capacity Building for INGB and TC 78 Members

To prepare the members of the Philippine Forest Certification System (PFCS) Interim National Governing Board (INGB) and the Technical Committee on Forest and Forest Products (TC 78) members, capacity building activities and stakeholders consultations were implemented by the Philippine Center for Environmental Protection and Sustainable Development, Inc. (PCEPSDI), the PFCS secretariat. This aims to ensure that the members are able to understand the systems and processes in forestry, certification, accreditation and standard development.

Philippine Wood Producers Association, Inc. (PWPA), one of the members of the PFCS INGB and chair of TC 78, actively participated in the different activities. Other members of the INGB and TC 78 are the Society of Filipino Foresters, Inc., Department of Trade and Industry Bureau of Philippine Standards and Philippine Accreditation Board, Department of Environment and Natural Resources Forest Management Bureau, among others also joined in the different activities.

PWPA is represented by Executive Director Maila Vasquez.
